

**MORTGAGE CREDIT CERTIFICATE
PROGRAM GUIDELINES**

The Mortgage Credit Certificate Program operates as an IRS tax credit. With a MCC, the qualified homebuyer becomes eligible to take a federal income tax credit of 20% of the annual interest paid on the mortgage each year for as long as the buyer lives in the home. This credit reduces the federal income taxes of the buyer, resulting in an increase in the buyer's net earnings and increases the buyer's capacity to qualify for a mortgage loan. Applications are processed through participating MCC lenders. Homebuyer may be subject to recapture tax if they sell their residence within 9 years.
