

# **REPORT**

#### DATE ISSUED: April 28, 2016

# **REPORT NO:** HCR16-045

**ATTENTION:** Chair and Members of the San Diego Housing Commission For the Agenda of May 6, 2016

**SUBJECT:** Portfolio Management Department - FY 2017 Capital Expenditures Plan

COUNCIL DISTRICT: 1, 2, 3, 4, 6, 7, 8, 9

# **REQUESTED ACTION**

That the San Diego Housing Commission (Housing Commission) recommend the Housing Authority of the City of San Diego approve the Housing Commission / Portfolio Management Department's Fiscal Year 2017 (July 1, 2016 – June 30, 2017) Capital Expenditures Plan to perform rehabilitation work at 87 different properties, including 39 single-family homes, for a total of 836 Housing Commission owned residential affordable housing rental units as detailed in Attachment 1: "Proposed FY 2017 Capital Expenditures."

# **STAFF RECOMMENDATION**

That the San Diego Housing Commission (Housing Commission) recommends that the Housing Authority of the City of San Diego (Housing Authority) approve the following actions:

- 1) Authorize the Housing Commission President & Chief Executive Officer (President & CEO), or designee, without further action by the Housing Commission Board of Commissioners or the Housing Authority, to award contracts concerning the completion of the capital needs referenced in the report "Proposed FY 2017 Capital Expenditures" for Fiscal Year (FY) 2017 (July 1, 2016 June 30, 2017) and any future years provided that:
  - a. Funds for the contracts are contained within Housing Authority approved budgets for FY 2017 and thereafter; and,
  - b. The Housing Commission's procurement methods, as set forth within the approved Statement of Procurement Policy, are followed in connection with each proposed contract; and,
- 2) By the approval of this matter, grant the President & CEO, or designee, the right and power to expend all funds approved by the Housing Authority contained within the 2017 Portfolio Management Department's Capital Expenditure Budget, as approved by the Housing Authority without further approvals by the Housing Commission Board or the Housing Authority;
- 3) Authorize the President & CEO, or designee, to substitute approved funding sources with any other available funds as deemed appropriate, and contingent upon budget availability, and further authorize the President & President & CEO, or designee, to take such actions as are necessary, convenient and/or appropriate to implement this approval and delegation of authority by the Housing Commission upon advice of General Counsel; and
- 4) Authorize the President & CEO, or designee, to execute all documents and instruments necessary and/or appropriate to implement these approvals, in a form approved by General Counsel, and to

April 28, 2016 Portfolio Management Division - FY 2017 Capital Expenditures Plan Page 2

take such actions necessary and/or appropriate to implement these approvals in connection with the implementation of the FY17 Capital Expenditures Plan.

# **SUMMARY**

In 2014, the Housing Commission procured a third party to conduct a Green Physical Needs Assessment (GPNA) on the Housing Commission's 155 rental properties. The GPNA recommends rehabilitation work on the Housing Commission's owned properties over a 20-year period. The scope and extent of rehabilitation work in a given fiscal year is dependent upon available funding. In FY 2017, through a combination of funding sources outlined below, the Portfolio Management Department proposes a budget allocation of \$16,398,637. This level of funding in FY 2017 provides an exceptional opportunity to conduct capital improvement critical needs work per the recommendations of the GPNA on multiple Housing Commission properties included in its three FHA LLC portfolios (44 properties), plus three properties in the North Bay and North Park neighborhoods, and 39 single-family homes (see Attachment 1 for proposed property lists). In the context of the proposed FY 2017 rehabilitation work, "critical needs" are defined as the replacement of doors, windows, cabinets and countertops, as well as upgrades to the electrical systems and HVAC repairs, as needed. This work will be project managed by the Assets Preservation Unit within the Portfolio Management Department.

In addition to addressing critical needs on the above referenced properties, five properties will receive comprehensive rehabilitation work: 121-125 Averil Road (14 apartments), 2052-2098 Via Las Cumbres (84 apartments) and three single-family homes. This work will be project managed by the Housing Commission's Development Services Department.

When prioritizing the properties to undergo rehabilitation during FY 2017, staff took different matters into consideration, such capital needs reported as per the GPNA study, property site inspections conducted by Portfolio Management, and comments from site staff (Property Managers and Maintenance Technicians). Additional considerations, such as age of the properties, financing structure, and probability for repositioning of the asset, were also considered in the prioritization process.

Federal Moving to Work (MTW) dollars (\$12,000,000) will fund the critical needs renovations at the three FHA LLC portfolios (which LLCs are wholly owned by the Housing Commission) and the comprehensive rehabilitation work at 2052-2098 Via Las Cumbres. City of San Diego bond funds (\$458,000) are the financing source for the critical needs renovation of three properties in the North Bay and North Park neighborhoods. Local property cash reserves (\$958,571) will fund capital improvements at the 39 single-family homes. Local property cash reserves will also fund staffing costs and budget contingency line items (\$2,982,066). Portfolio Management has confirmed sufficient property cash reserves are available at the level proposed for FY 2017.

Portfolio Management is working closely with other Housing Commission Departments (e.g., Procurement, Property Management, Wage Compliance, and Financial Services) to plan for the efficient and effective expenditure of the proposed FY 2017 budget allocation to ensure that the proposed FY 2017 scopes of work will be completed within FY 2017.

The Statement of Procurement Policy requires the Housing Commission Board to approve all contract expenditures that are more than \$100,000 and the Housing Authority to approve maintenance and capital improvement contract expenditures that are more than \$500,000. Requiring an additional approval for each project after the annual budget has been approved would add an additional step and approximately four to eight weeks to the contract award and execution timeline. The time saved by allowing the

April 28, 2016 Portfolio Management Division - FY 2017 Capital Expenditures Plan Page 3

budget approval process to replace the need for individual approvals for each project in the budget, would address the critical needs of dozens of properties in a more timely manner, increase the likelihood of meeting certain funding source deadlines, and result in a more efficient contracting process.

To ensure transparency, these projects will be posted on SDHC's website with dollar values and anticipated bid dates and will be updated on a quarterly basis. Bid results will be provided to the Housing Commission Board and Housing Authority on a quarterly basis.

This streamlining initiative comports with actions approved by the San Diego City Council via Ordinance Number O-20148, which streamlined its Capital Improvement Program by raising authority limits requiring City Council approval.

# AFFORDABLE HOUSING IMPACT

The proposed FY 2017 Capital Expenditures Plan based on GPNA recommendations will conduct rehabilitation work on 87 Housing Commission-owned properties, or 56 percent of the Housing Commission's rental portfolio. This rehabilitation work will positively impact the lives of 742 low-income families.

# FISCAL CONSIDERATIONS

The funding sources related to the implementation of the proposed FY 2017 Capital Expenditures Plan are included in the Housing Commission's FY 2017 Budget staff report, scheduled to be heard by the Housing Commission Board on May 6, 2016, and the Housing Authority on June 14, 2016. The proposed FY 2017 Capital Plan will be presented to the Housing Commission Board and the Housing Authority on the same dates as the Housing Commission's FY 2017 Budget.

Any future funds related to Portfolio Management's proposed Capital Expenditures Plan will continue to be incorporated and presented for approval with the Housing Commission's annual budget request, so that once approved for FY 2018 and thereafter, the rights and powers referenced by the this action shall continue into FY 2018 and thereafter, provided that the Housing Authority annually approves the Capital Plan annual budgets.

# EQUAL OPPORTUNITY/CONTRACTING

Contracts will be awarded in accordance with the Housing Commission's approved Statement of Procurement Policy. Section 3 of the Housing and Urban Development Act of 1968, Equal Opportunity Contracting and prevailing wage requirements will be included in all solicitations.

# **KEY STAKEHOLDERS and PROJECTED IMPACTS**

The FY 2017 Capital Plan will have a significantly positive impact on hundreds of Housing Commission's residents. Important as well will be the improved appearance of the properties, positively impacting the surrounding neighborhoods.

# **ENVIRONMENTAL REVIEW**

Approval of the FY 2017 Capital Expenditures Plan is categorically exempt from the requirements of the California Environmental Quality Act (CEQA) pursuant to Section 15301 because the subject properties are existing facilities and the proposed maintenance, modernization, or improvement activities do not involve expansion of existing uses.

Furthermore, approval of the Capital Expenditures Plan is categorically excluded from the National Environmental Policy Act pursuant to Part 58.35(b)(3) and exempt per Part 58.34(a)(3) of Title 24 of the Code of Federal Regulations. Any undertaking related to the modernization or improvements of an existing facility, with a scope determined be unrelated provision of maintenance, furnishings, or equipment, will be re-evaluated in conformance with 24 CFR 58.5 prior to the commitment of any federal funds.

Respectfully submitted,

Emmanuel Arellano

Emmanuel Arellano Director of Portfolio Management Real Estate Division San Diego Housing Commission

Approved by,

Deborah N. Ruane

Deborah N. Ruane Senior Vice President Real Estate Division San Diego Housing Commission

Attachment: Report prepared by the San Diego Housing Commission Portfolio Management Department of the Real Estate Division: "Proposed FY 2017 Capital Expenditures"

Hard copies are available for review during business hours at the security information desk in the main lobby of the San Diego Housing Commission offices at 1122 Broadway, San Diego, CA 92101 and at the Office of the San Diego City Clerk, 202 C Street, San Diego, CA 92101. # Proposed FY 2017 Capital Expenditures

San Diego Housing Commission is committed to providing safe, clean, energy efficient and well maintained affordable rental housing for the citizens of San Diego. In a city with rents among the highest in the country, low and moderate income San Diego residents are all too often forced to choose where they live based on rents they can afford no matter the physical condition of the apartments. With the highest number of affordable housing apartments in the city, with its commitment to quality housing, San Diego Housing Commission is mission driven to ensure our city's low and moderate income residents have access to quality housing options.

The SDHC Portfolio Management Department, in cooperation with Property Management and supporting SDHC departments, is pursuing a fiscal and organizational planning process to evaluate and implement capital improvements across SDHC's portfolio (155 properties). The Green Physical Needs Assessment (GPNA) of the SDHC portfolio conducted in 2015 provides a property by property and year by year listing of needed rehabilitation work. The ongoing property inspections by Portfolio Management's Housing Construction Supervisors provide additional property assessments to help SDHC prioritize the most urgent capital needs.

Given limited property and external rehabilitation funding sources it is incumbent upon those engaged in the budgeting process to consider effective strategies to address the most urgent physical needs of SDHC's 155 properties, understanding that difficult choices will be required. *Portfolio Management Proposed Fiscal Year 2017 Capital Expenditures* is presented in the context of limited funds and great capital expenditure needs. With access in this fiscal year to Moving to Work funds, in tandem with property and lender replacement reserves, the strategy is to conduct critical needs rehabilitation on a multiple portfolio basis while also focusing on a couple of more urgent properties.

Even with significant Moving to Work funding proposed for FY 2017, leveraged with property and lender required replacement reserves, capital improvement funds are available to address only a portion of the SDHC portfolio in this fiscal year. As the Portfolio Management Department plans for rehabilitation projects in FY 2017, the capital improvement plans for FY 2018 are also considered in order to ensure sufficient property replacement reserves are accrued and allocated. In this regard, responding to the capital improvement needs of SDHC's portfolio is a multiyear strategic endeavor as we plan for and execute the effective use of rehabilitation funds.

We look forward to an interactive evaluation of this proposal that will result in improving the lives of SDHC's low and moderate income residents.

Hanan Bowman Asset Strategy Manager

# **SDHC Portfolios:** *Background*

With the formation of three FHA and three FNMA LLCs in 2009, the support and maintenance of the properties shifted from HUD Capital Funds to property generated revenues in the form of rental receipts, lender and property replacement reserves, supplemented from time to time by external funding sources. The transition from public housing to SDHC owned assets mandated the need for a corporate paradigm shift in SDHC's identity as an owner and developer of affordable housing. San Diego Housing Commission's acceptance of the responsibility for the safety, health, welfare and quality of life of its residents presumes a corporate infrastructure to monitor and proactively respond to issues impacting the property and asset management of the portfolios. Since 2010 the SDHC has been engaged in defining and refining its organizational structures needed for effective affordable housing development and ownership.

The difficulty but also the urgency of the ongoing maintenance and capital needs of SDHC's 155 properties are heightened by the aging of its housing stock. The average age of SDHC's portfolio is 39 years (not including the Hotel Churchill / 1915). Additionally, approximately sixty-five percent (65%) of the portfolio are scattered site multifamily properties with fewer than ten (10) apartments, further exacerbating property management challenges.

Aging cabinets

The impact of aging is reflected in the stressed physical condition of the portfolios' quality of life items. Original construction components are frequently still in place (e.g., single pane windows,

**Chipped Countertop** 

worn kitchen countertops and cabinets, undersized electrical capacity, inefficient hot water

heaters, aging appliances). Building exteriors show a range of failing systems (e.g., building plumbing, exterior stair tread failure, railings not to code). Although the Property Management team ensures health and safety items are addressed,<sup>1</sup> the magnitude and extent of the portfolios' quality of life rehabilitation needs must be recognized as a corporate priority reflecting the SDHC's commitment to the provision of clean, safe and quality housing.

*We are About People*. The SDHC is not a real estate investor looking for good deals that can be flipped for maximum profit. We

are in the business of strengthening families. A core component of SDHC's affordable housing mission is customer focused property and asset management. The condition of the apartments is key to quality customer service. Children are comfortable inviting their friends to their homes

<sup>&</sup>lt;sup>1</sup> Note consistent FHA portfolio REAC scores above 90 that measure health & safety conditions.

to play. Families feel integrated into their neighborhoods. Our residents consider their homes to be a place of pride, a safe haven, an environment that enhances one's self-image.

# Green Physical Needs Assessment: 2017

In 2015 SDHC completed a physical needs assessment (GPNA) of its entire portfolio. This assessment offers property by property and year by year the estimated costs of needed work

over the next twenty years. Since the Transition out of the Public Housing program in 2007, the health, safety and quality of life conditions of SDHC's portfolios are contingent upon the interplay of rental receipts, net operating income, and the level of property or lender required replacement reserves. Given the 20 year GPNA estimated portfolio-wide capital needs of ~\$200MM, the annual proposed capital expenditure budget must reflect a careful prioritization of the best uses of available funding.

Old and damaged range hood

Portfolio Management Department's proposed FY 2017 capital expenditures as identified in the GPNA will be funded from three sources: Moving to Work, local property funds and city

redevelopment dollars. Although Moving to Work funding provides an opportunity to address quality of life needs among multiple portfolios and dozens of properties the cost of needed rehabilitation greatly exceeds funding resources. Within the context of limited funding to address multiple year GPNA issues, the prioritization strategy proposed for this fiscal year is a balance between the critical needs of dozens of properties and more intensive rehabilitation work on selected sites.

**Table One** presents an overview of the five project areas and the three funding source(s):

- FHA North, Central and South: *Moving to Work*
- Via Las Cumbres / non-PHA apartments: *Moving to Work*
- Single Family Homes: critical needs: Local Funds
- Single Family Homes: comprehensive rehabilitation pilot: Local Funds
- North Bay and North Park Redevelopment: City / Redevelopment Bond Funds

# **Moving to Work**

Access to Moving to Work funds (*proposal*: \$12,000,000) in FY 2017 offers a significant opportunity to conduct capital needs rehabilitation at dozens of sites while also focusing on a specific property that requires more intensive rehabilitation.

# FHA Portfolios (\$6,764,191 / including Averil Road [below])

Moving to Work funds will support the repair and replacement of critical needs at all properties among the three FHA LLCs, a total of 45 properties and 773 apartments. "Critical needs" are defined as the replacement of doors, windows, cabinets & countertop and upgrades to the electrical systems to 100 amps and HVAC repairs as needed. Residents of these properties will live in apartments that enhance the families' sense of pride in their homes which in turn will spur a self-identity that forges a motivation to reach the families' highest potential.

**121 – 125 Averil Road [FHA South]** (\$1,043,046 / included in the FHA portfolio amount listed above)

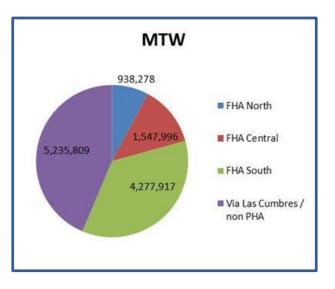

The Housing Construction Supervisor's inspection and knowledge of this property in the FHA South portfolio supports a more intensive rehabilitation scope of work. Given the proposed scope and the likely use of a general contractor with multiple subcontractors, the Development Services Department may be better positioned to implement this contract.

Corroded water line at Averil Rd

# 2052 – 2098 Via Las Cumbres [non-PHA] (\$5,235,809)

During FY 2016 (construction contract signed by May 2016), the

Development Services Department will pursue the comprehensive rehabilitation of the thirty-six (36) public housing apartments at Via Las Cumbres. The residents of the 84 non-PHA apartments of this property will legitimately expect to receive a corresponding level of rehabilitation. Moving to Work funds will allow the rehabilitation of these 84 apartments to be scheduled in FY 2017. The total estimate for the 84 unit rehabilitation is \$5,449,369. Local funds (\$213,560) will be added to supplement Moving to Work dollars. The

result will be one hundred and twenty PHA and non-PHA Via Las Cumbres apartments will be rehabilitated to serve our residents for many decades to come.

# **Local Funds**

"Local funds" are understood to include surplus rental receipts, property and lender reserves. Proper budget planning includes a critical analysis of the most efficient and cost effective strategies to allocate spending throughout the proposed projects. Since the three FHA LLC lenders reserve accounts have not been accessed since the formation of these LLCs, sufficient lender reserve balances have accrued to contribute to the project sources for those elements of the scopes of work that are legitimate replacement reserve eligible items.

#### Single Family Homes: Critical Needs (\$485,640)

San Diego Housing Commission's thirty-nine (39) single family homes were constructed from 1970 to 1975 (one built in 1941). Although the SDHC Property Management team ensures the homes continually meet health and safety housing quality standards, the homes' quality of life elements require rehabilitation upgrades. Twenty-two of the families have lived in their homes

for at least five years, five families for over twenty years. Original single pane windows, kitchen cabinets and countertops, and flooring are still in place. Many of the roofs and hot water heaters have reached the end of functional service. The homes' electrical system should be upgraded to 100 amp service. Termite damage, even if an inactive infestation, requires mitigation and repair. Given the homes' construction dates, the presence of lead paint and asbestos are also likely.

Corroded sink faucet

The Green Physical Needs Assessment

(GPNA) estimates \$2,081,411 in Single Family Home capital improvements over the next five years. By 2035, the GPNA calls for capital improvements of \$4,521,248. While these numbers are estimates only, the figures highlight the extent of needed work. Until SDHC determines the homes' long range disposition strategy<sup>2</sup>, addressing critical needs in FY 2017 will stabilize the properties until a disposition plan is determined and implemented.

The rehabilitation work to address critical needs of all 39 homes will include roofing, hot water heaters, electrical upgrades, lead and asbestos remediation and termite damage repair. Per the GPNA the anticipated estimate for this work will be \$526,110 (\$13,490 / home).

<sup>&</sup>lt;sup>2</sup> Scattered Site Housing Disposition Study, Barry Getzel, August 2015 outlines various disposition options.

# Single Family Homes: Pilot Projects / Comprehensive Rehabilitation (\$259,371)

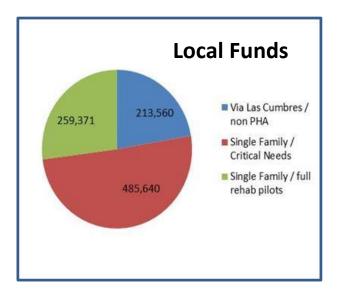

The Single Family Homes' long range disposition strategy will be informed by an understanding of the costs and physical requirements likely to be encountered should comprehensive rehabilitation of the 39 homes be incorporated into this disposition strategic planning. As such,

the FY 2017 budget proposes the comprehensive rehabilitation of three pilot properties. Since the 39 homes have similar floor plans (adjusted for bedroom count), the comprehensive rehabilitation of three homes will add to our understanding of the scope of work if / when the decision is made to continue with comprehensive rehabilitation of the remaining 36 homes. The comprehensive rehabilitation of three homes is estimated at \$259,371 (\$86,457 / home), including the replacement of countertops, cabinets, appliances, flooring, windows, doors, roofing, hot water heater, lead and asbestos remediation, electrical upgrades, termite damage repair, and interior and exterior painting. The criteria for the selection of these pilot homes include (a) the length of current

Moisture on ceiling from water leak

residency, (b) geographic proximity of the three homes to increase construction efficiencies and (c) families holding Housing Choice Vouchers. Item (c) is significant should the disposition strategy include the sale of home(s) to the current residents using the Housing Choice Voucher program.

*Table Two* lists the 39 homes and indicates the proposed homes for the pilot projects (Layla Way, Kostner Drive and Marcia Court).

The total hard cost estimate for both critical needs (39 homes) and the three pilot projects is \$745,011. Added to this hard cost estimate will be administrative expenses for project management plus hard and soft cost contingencies, estimated at an additional \$235,000 included in the overall project contingency lines (cf. Table Three / page 9).

# Table Two

# North Bay & North Park Redevelopment Area: Bond Funds

Funds from the City of San Diego Redevelopment are expected to become available to address rehabilitation needs for three properties, two in the North Bay region and one in North Park:

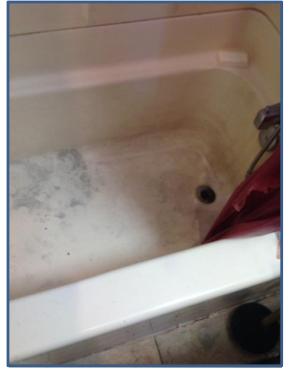

# North Bay (\$313,000)

- 4890 Naples Street (4 apartments)
- 2701 2711 Figueroa Boulevard (6 apts.)

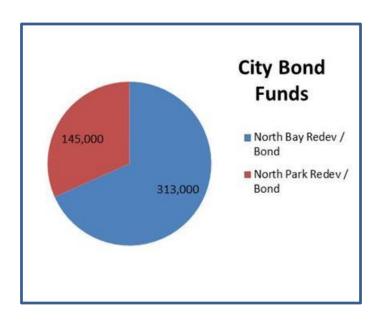

# North Park (\$145,000)

■ 4080 Arizona Street (4 apartments)

**Naples Street** is slated to receive major rehabilitation including work on the building's exterior, new roof and window replacements, new cabinets & countertops, new appliances, hot water heater, termite mitigation and landscaping.

Damaged bathtub and tub surround

**Figueroa Boulevard** will receive work on the building's exterior, roof and window replacements.<sup>3</sup>

Arizona Street will receive work on the building's exterior, roof, window and hot water tank replacements, and landscaping upgrades.

The timing and amount of confirmed funding from the City of San Diego will determine the final scope of work and project scheduling.

<sup>&</sup>lt;sup>3</sup> It is recognized that the Figueroa Boulevard property is also proposed to receive rehabilitation work as a component of the FHA North LLC. The only overlap between the FHA LLC scope and the Redevelopment Bond Funds scope are window replacements. The specifics of the FHA North LLC scope referenced in Table One reflect the North Bay Redevelopment window replacement work at 2701 – 2711 Figueroa Boulevard.

# **Administration and Contingencies**

The proposed FY 2017 budget includes line items for administrative costs (e.g., project management) and hard & soft contingencies. Until each scope of work contract is finalized, the budget numbers are estimates only, derived from the GPNA. Housing rehabilitation reveals many unknown elements during the course of the work. A hard cost contingency of twenty percent (20%) is suggested. A ten percent (10%) soft cost contingency is also proposed to cover such items as relocation and permits & fees.

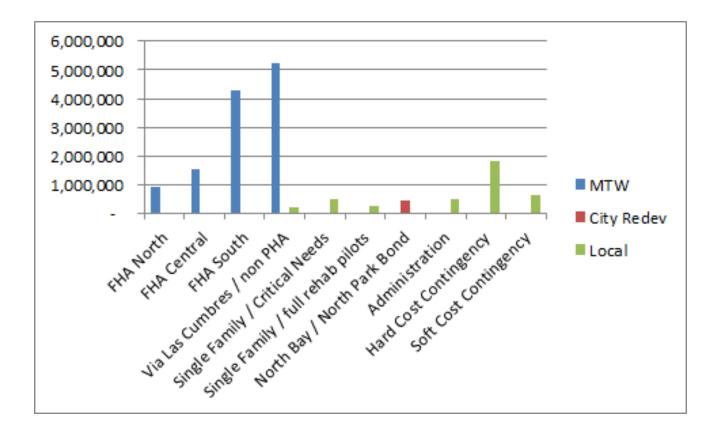

# **Sources: Budget Summary**

**Table Three** is a synopsis of the proposed FY 2017 Portfolio Management Department project budgets. Of course, the rehabilitation of SDHC's full portfolio is a multiyear endeavor. Although the total proposed FY 2017 capital needs budget (including administration and contingencies) is recognized to be larger in this fiscal year than is likely in future years due to the availability of Moving to Work dollars, each year the Portfolio Management Department in partnership with Property Management and the supporting departments (e.g., Procurement, Wage Compliance and Fiscal Management) will focus on the most strategic approach to the use of property funds and when possible, non-property generated resources (e.g., refinancing, equity infusion [LIHTC], property sales, etc.). Each year's rehabilitation budgeting will represent a component of the longer range multiyear analysis of the most effective strategies to fund needed capital expenditures.

# 2016 – 2017 Budget Estimates, GPNA Totals & FY 2017 Impact

**Table Four** shows the percentages of FY 2017 estimated costs in comparison to the GPNA's five and twenty year estimates. One notes the significant impact the proposed FY 2017 capital needs / rehabilitation expenditures will contribute to the properties' long range fiscal and asset strategic planning. More particularly, the allocation of the proposed MTW, local funds and city redevelopment dollars will directly impact the lives of 826 families residing in SDHC apartments and homes. As a result of these proposed FY 2017 capital expenditures, over 2,000 low and moderate income San Diego residents will live in safe, well-constructed and more energy efficient homes. This truly will be a tangible and highly impactful representation of San Diego Housing Commission's *We're About People*.

\*\* "% FY 17 to 5 Yr Need" in excess of 100% results from 2017 budget exceeding the GPNA's suggested 5 yr work.

# **Funding Contingencies**

Although the GPNA estimates are considered to be conservative, at this point we must consider the prioritization of funding contingencies should estimates require additional dollars. Unexpected construction issues typically emerge during rehabilitation. The budget can be confirmed only when the procurement process reaches the contract stage. If the FY 2017 sources (e.g., Moving to Work) are less than proposed, property replacement reserves may serve as gap funding. Lender reserves for the three FHA LLCs have not been accessed since 2010 and thus have accrued over the past six years a viable source for those expenses considered to be legitimate replacement reserve eligible items.

# **Property and Lender Replacement Reserve Balances**

The following **Table Five** shows the current property and lender reserve balances by FHA portfolio and reserves at the non-PHA apartments at Via Las Cumbres (VLC) as of 12-31-2016. If MTW funds are less than proposed, these reserve funds would be available as gap funding.

|                  | Units | м  | in RR Bal | IV | Ionthly | Reserves     |              | Delta     |

# **Impact to Supporting Departments**

The proposed scopes of work will involve the procurement of multiple contracts, some using Job Order Contract (JOC), and others a formal bid process. To manage successfully multiple simultaneous projects and to prepare the procurement for each contract will require much appreciated assistance from other SDHC departments:

- Property Management
- Prevailing Wage
- Procurement
- Fiscal

The use of Moving to Work funds will likely require additional property management compliance responsibilities. Specifically, although not entirely certain at this point, properties receiving MTW rehabilitation funds may be required to conduct annual household gross income recertifications. Self-certifications may be allowed rather than the more formal third party income verification. Further clarification of MTW regulations will be needed to understand the full impact of these funds on property management and the procurement process.<sup>4</sup>

<sup>&</sup>lt;sup>4</sup> Cf. *Amended and Restated Moving to Work Agreement*, January 14, 2009. Attachment C, Section C. 4: "...the Agency is expressly authorized to adopt a local system of income verification in lieu of the current HUD system."

Table six shows seven distinct procured bids, either JOC or competitive bids:

- FHA North
- FHA Central
- FHA South
- VLC
- Single Family / critical needs
- Single Family / Pilot projects
- North Bay & North Park Redevelopment

Portfolio Management will work closely with the Procurement Department to determine if this is the best separation of the work and the most efficient process to implement these separate contracts.

Portfolio Management Department will ensure that timely and detailed notice is given to ensure that supporting departments are aware of and can plan for the work needed to implement these projects successfully. Project planning will be adjusted if it is determined that the timing or scope of the work is not within organizational capacity. The appropriate procurement method for each project will need to be determined. A significant concern for this level of project planning is the time and staffing requirements to ensure the proper implementation of each project. Portfolio Management will convene the appropriate meetings to understand concerns and possible limitations that will further refine the scopes of work.

# Fiscal Year 2017 – 2018

The strategic planning for the ongoing rehabilitation of SDHC's portfolio is informed by the GPNA's twenty year estimates. The extensive rehabilitation work proposed for fiscal Year 2017 will impact hundreds of properties and thousands of San Diego residents. However the FY 2017 capital expenditure budget is of necessity limited to selected properties. The capital needs of the 34 FNMA properties are no less urgent than those of the FHA LLCs, at least for FNMA North and Central. The physical condition of Belden's 234 apartments is likely less of a concern than the 33 properties of the other two FNMA regions although as noted below, Belden as a senior property requires ADA compliance improvements.

Addressing the rehabilitation capital improvement needs of SDHC's portfolio is a multiyear process requiring a strategic view to the use and accrual of limited property and external resources. Using the GPNA estimates as a guide, a broader, perhaps five year, rehabilitation plan will be formulated in calendar year 2016. This multiyear strategic planning overview will aid each annual budgeting process to establish the fiscal context for a given year's budget.

# FNMA Central and South (\$7,828,344)

Using the year to year estimates of the GPNA, this budget amount will allow the rehabilitation of the 33 properties (323 apartments) of FNMA North and Central, addressing capital expenditures through the GPNA's listing of identified needs through year 2020. The scope of work will include roofing, windows, cabinets & countertops, appliances, range hoods, hot water tanks, termite remediation, building plumbing and HVAC issues, and landscaping.

# 7705 – 7795 Belden Street (\$703,357)

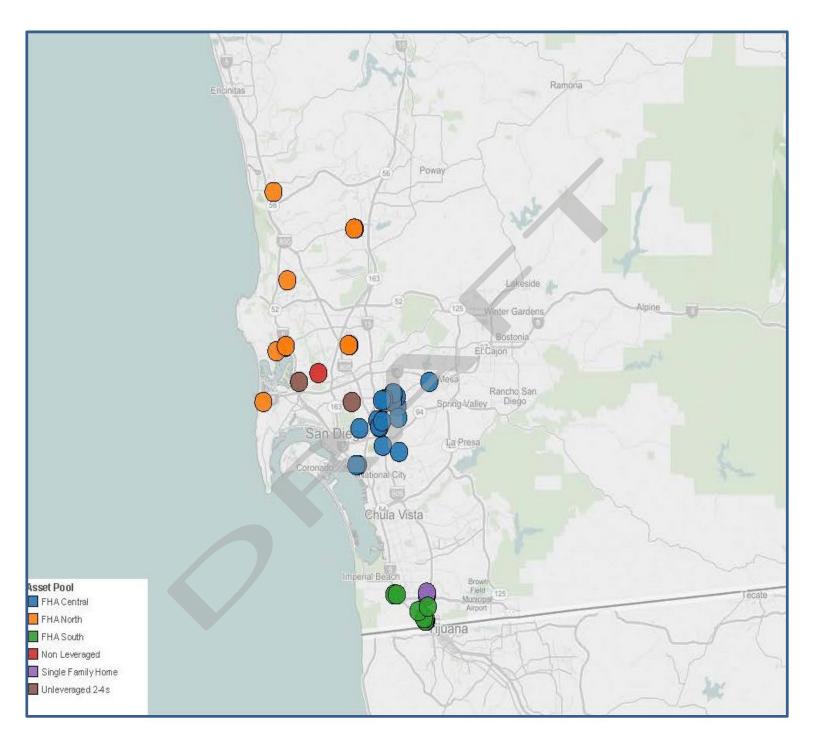

As a property serving seniors exclusively there is a significant need for ADA compliance improvements at the Belden Street property.

# Budget Source: Property Reserves

The expected budget sources in FY 2018 are presumed to be property funds, primarily surplus rental revenue and property and lender replacement reserves. As such during FY 2017 asset management must ensure that excess rental receipts are being channeled into the property replacement reserve accounts at a level to achieve the funds needed for the FY 2018 FNMA projects. At an estimated FY 2018 budget of \$11.5 MM, the average reserve amount per unit would be \$3,560/year, assuming ~\$3.0 MM remains in property reserves after the FY17 capital projects.

| FY 2017 - 2018        |                  |
|-----------------------|------------------|
| FNMA North & Central  | 7,828,344        |
| Belden Street         | 703,357          |
| Subtotal              | \$<br>8,531,701  |
| Administration        | 500,000          |
| Hard Cost Contingency | 1,706,340        |
| Soft Cost Contingency | <br>853,170      |
| Total                 | \$<br>11,591,211 |

# **Portfolio Management / Preservation Team**

in 2015 SDHC formed an Asset Preservation Team to develop short and longer term strategies to identify prioritized capital needs and corresponding funding streams. The core objective of the Preservation Team is to plan for and implement rehabilitation work as needed throughout SDHC's rental housing properties and commercial spaces.

Preservations Team members:

John Ayala [Housing Construction Supervisor]: Three decades in housing rehabilitation and construction.

- Experienced in Public Agency work as a Housing Rehabilitation Inspector, Housing Construction Specialist, and Housing Construction Supervisor.
- Duties have included overseeing rehabilitation projects, supervise employees, manage capital improvement projects, perform property inspections, provide staff training and provide technical assistance to other departments.
- Experienced in rough framing and finish carpentry on new residential/commercial structures and home remodels.

**Steve Dean** [Housing Construction Supervisor]: Three decades in housing rehabilitation and construction.

- Redevelopment Agency of Salt Lake City for 7 years in the capacity of a Housing Rehabilitation Specialist.
- SDHC since 6/17/85 in various positions, all dealing with the maintaining of private and public housing units in decent, safe living conditions.

**George Hunt** [Housing Construction Supervisor]: Over 20+ years working in remodeling and new construction field.

- 5 ½ years with the San Diego Housing Commission ranging from Maintenance Technician, Maintenance Specialist, Quality Assurance Coordinator and Housing Construction Supervisor.
- Duties at the Commission have included the make ready of units, the oversight of maintenance staff and outside contractor performance, Project Manager role for the reconstruction of units after building fires and floods, Construction Manager role for capital improvement projects, perform property inspections, provide staff training and technical assistance to other departments within the Agency.

**Tracey Meacock** [Senior Program Analyst]: Tracey has supported the Portfolio Management department by providing the team with budget and GPNA analytics to assist the team with project planning and scheduling. Experience and accomplishments prior to joining the preservations team include managing projects for the Property Management department, developing, publishing, and distributing analytical reports, and monitoring budgets.

**Emmanuel Arellano** [Director, Portfolio Management]: Since 2009, Emmanuel has worked at the San Diego Housing Commission where he assisted with the \$95 million equity refinance of the former Public Housing properties in addition to multiple special projects within the Real Estate department such as the refinance of the Smart Corner office building, the transition of 113 State funded units into the Public Housing Program, the implementation of the Smoke Free policy in Housing Commission properties, and the portfolio wide Green Physical Needs Assessment. Emmanuel has revamped the Housing Commission's Portfolio Management department given the responsibilities resulting from the transition out of the Public Housing program in 2007. Prior to joining the Housing Commission, Emmanuel worked at Bank of America in the Consumer and Retail Services division for eight years. Emmanuel is an MBA graduate from San Diego State University and a USD Alumnus of the Real Estate, Investment and Development program.

Hanan Bowman [Asset Strategy Manager]: Since 1990 Hanan has developed and operated dozens of affordable housing rental properties in Oregon and California using a wide range of public and private funding sources. Hanan was the founding executive director of Umpqua Community Development Corporation (CDC), Roseburg, Oregon, one of the fifty original Rural LISC CDCs. Moving to California is 2002, Hanan served as the deputy executive director of the Yolo County Housing Authority. He then worked for Mercy Housing California as a senior asset manager for five years before moving to San Diego in 2012 to work at City Heights CDC as its Real Estate Director. Hanan was appointed the chair of the Federal Home Loan Bank of Seattle's Affordable Housing Advisory Council. He was a founding member of the Oregon Association of Community Development Organizations and served as its chair. Hanan holds a Ph.D. in Ancient Near Eastern Languages and Literature from U.C. Berkeley and the Graduate Theological Union, Berkeley, CA.
